

Ohio Medical Marijuana Control Program Whole-Day Unit Policy Update

[Rule 3796:8-2-04](#) of the Ohio Administrative Code defines the increments in which medical marijuana products can be sold in Ohio Medical Marijuana Control Program dispensaries. The rules states:

A patient and a patient's caregiver(s) may collectively purchase no less than a whole day unit at a single time. A whole day unit shall equal the following amounts for each authorized form of medical marijuana:

- (1) One-tenth of an ounce (two and eighty-three hundredths grams) of plant material;*
- (2) Two-hundred ninety-five milligrams of THC contained in a patch, lotion, cream, or ointment;*
- (3) One hundred ten milligrams of THC contained in an oil, tincture, capsule, or edible for oral administration;*
- (4) Five hundred ninety milligrams of THC contained in oil for vaporization.*

Under the previous interpretation of the rule, no products amounting to less than the whole-day unit could be sold at a dispensary. However, after collaboration between stakeholders and the State of Ohio Board of Pharmacy, the interpretation of the rule is as follows:

Form	Minimum Increment Under Original Interpretation	Minimum Increment Under New Interpretation
Oils for vaporizing	590 mg THC	Up to 590 mg THC
Patch, lotion, cream or ointment	295 mg THC	Up to 295 mg THC
Edibles, oils, and tinctures for oral administration	110 mg THC	Up to 110 mg THC

- “Up to” language only applies to products containing less than the minimum increment of processed products
- Patients can now purchase products with high CBD content and low THC content in more reasonable quantities
- THC and CBD target doses continue to be required on product labels
- Actual cannabinoid dose must still fall within \pm 5% of target dose
- Plant material is not impacted
