

## Ohio Medical Marijuana Control Program METRC Training Update

Both the MMCP and the Metrc team have been working diligently to put together a system to meet the specific needs of the medical marijuana industry here in Ohio.

As a part of the required foundational training, dispensary employees are required to receive training on Metrc's Seed-to-Sale-system. This training is imperative because every licensed business is required to report medical marijuana distribution chain activity and each employee will need extensive knowledge of the Ohio Metrc system to ensure accurate reporting. Metrc's training plan accounts for the fact that potential end-users have various levels of exposure and understanding, as well as different needs. Introductory courses are going to be geared for new licensees that have no prior exposure to Metrc. As the program evolves, Metrc will provide advanced training courses focused on further educating users who have already been operating in the system.

Initially, these new business training classes will be provided in a webinar-based format to licensees. These webinar-based training classes will be offered every Monday from 10:00 AM – 1:00 PM ET. The classes are instructor-lead and provide a walkthrough of Metrc's functionality. An interactive question-and-answer session will be offered at the conclusion of each class. You can sign up for classes through <https://www.metrc.com/ohio>.

The required information to be registered and to receive a registration link for training is below:

- Company Name
- Email
- First Name
- Last Name
- Phone Number

As a reminder Metrc only trains individuals who are employees and owners within a licensed or provisionally licensed business.
